

# Grapes

Several Pounds of grapes are needed to fill 4 medium trays

[Adventures in Freeze Drying for Beginners: The Grape Experiment](#)

## Ingredients:

Grapes of your choice

## Directions:

1. Use your favorite method for cleaning grapes, a chemical free way is to dip in boiling water and then rub each grape with a paper towel.. You can also add a cap full of vinegar to a sink of cool water and let the grapes soak, make sure to rinse thoroughly.
2. Slice each grape in half
3. Line trays with parchment or silicone if you choose, easier to remove from trays if they are lined
4. Spread out in a layer
5. Freeze

**Cycle Time:** My cycle time was ~24 hours in a a Medium Freeze Dryer with a Premier Pump

**Rehydration:** Not intended for rehydration
